

It's a lemon!

Intercounty Connector Toll Road

The state's own ICC study shows:

- NO relief on I-95, I-270 or I-495 with ICC¹**
- ICC \$7 daily toll = \$1,500 per year²**
- More than half of local roads studied would get more congestion or show no relief with ICC³**
- More cars would drive more miles⁴ causing more global warming gases**

NOW is the time to tell Gov. O'Malley to fund transit and road improvements, NOT Gov. Ehrlich's \$3 Billion Intercounty Connector Toll Road.

Your voice can make a difference. No ICC construction has begun. Lawsuits have been filed. We can't clean up the Bay, take on global warming AND build the ICC.

Tell Gov. O'Malley not to spend your tax dollars on a lemon.
